Work faster, smarter and safer.

- Adobe Document Cloud e-signing and PDF tools are built right into Microsoft 365.
- That means everyone in your organization can transact business and collaborate faster in their favorite Office apps.

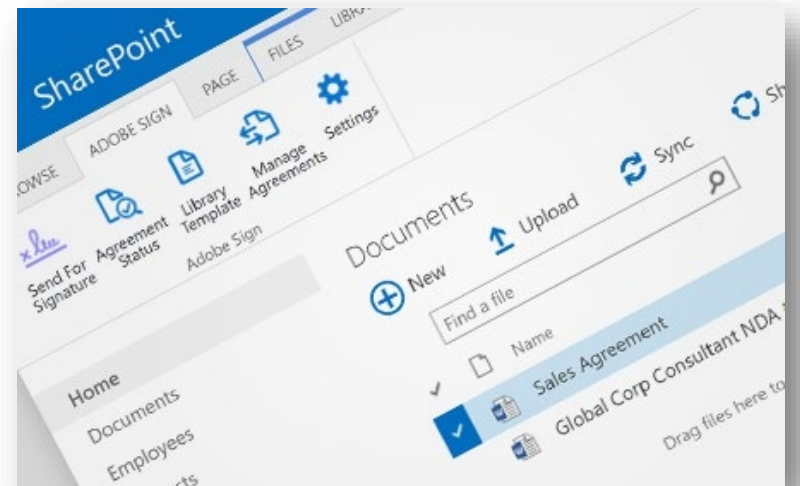

Get more out of Office 365 with Acrobat and PDF services.

- Now everyone on your team can work seamlessly with PDF files, right inside Office 365.
- Work where you want. Convert Word, Excel or PowerPoint files to PDF in Office 365 or work with Office files in Acrobat. The choice is yours.
- Do more online. Combine documents into one PDF and rearrange pages from within OneDrive for Business or from SharePoint, Word, Excel or PowerPoint online.
- Protect your files with confidence. Password-protect files in Office 365 to safeguard confidential information and restrict copying, editing and printing.

SharePoint

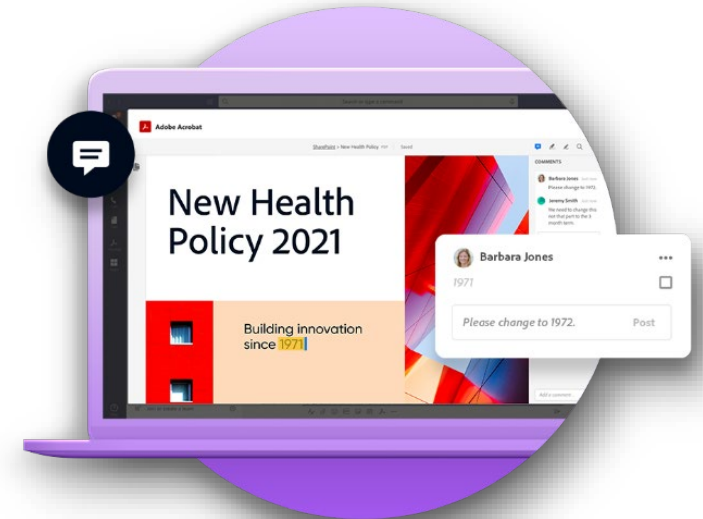

Use Document Cloud solutions with SharePoint to streamline your document workflows.

- Do more online. Convert Microsoft 365 files to PDF, present documents in one PDF, and rearrange pages, right from SharePoint online.

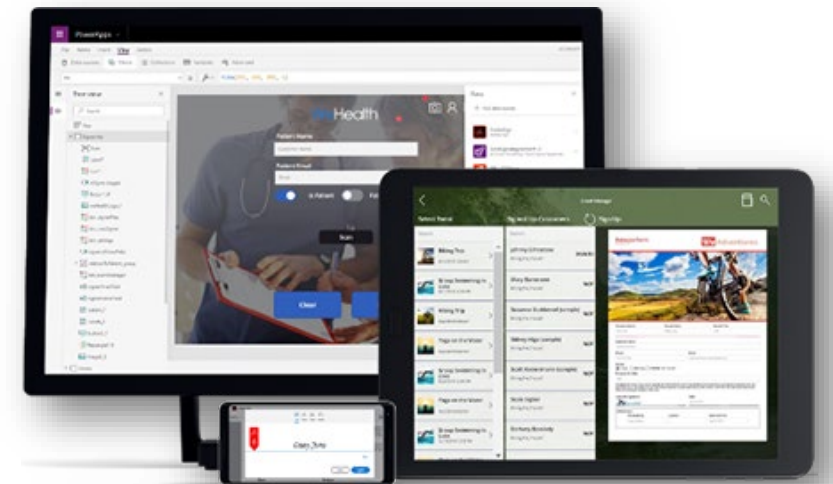

Microsoft Teams

- Make document collaboration a team sport. When you integrate Acrobat and Teams, multiple Acrobat users can simultaneously view, comment, and annotate on high-fidelity PDFs. Files are stored in SharePoint, OneDrive, or Teams for easy access.

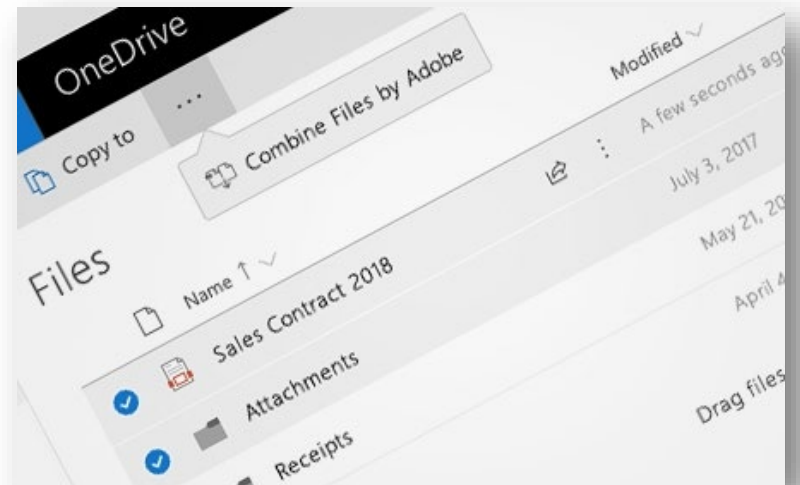

Microsoft PowerApps and Microsoft Flow

- Accelerate Business Processes. Automate hundreds of business processes such as field service, sales quotes, candidate offer letters, employee benefits, and IT approvals.
- Get More from SharePoint, Microsoft 365, and Dynamics. Build automated signature and approval steps into your custom business apps.

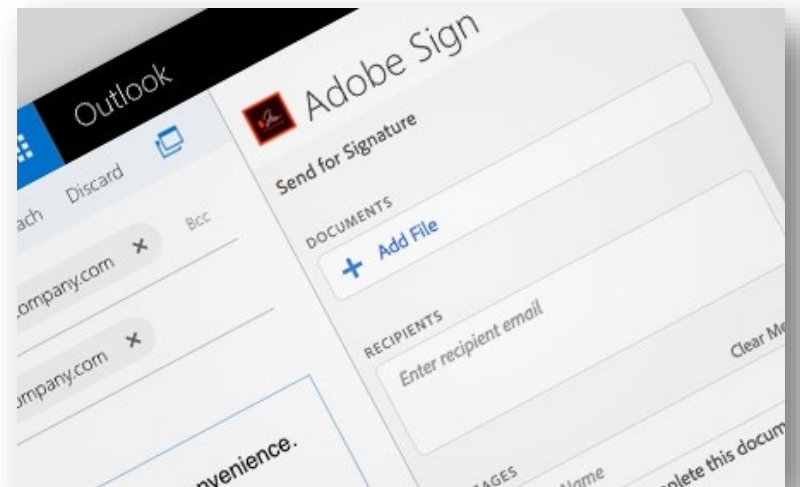

OneDrive for Business

- Do more online. Convert Office files to PDFs, combine documents into one file, and rearrange pages — right from OneDrive for Business.
- Convert PDFs. Turn PDFs into editable Word, Excel, or PowerPoint files online or from your mobile device. Acrobat preserves all formatting.

Outlook

- Send documents for signature and check their status right in Outlook. Use autofill and sign technology to recognize fields and sign documents you receive. Use Acrobat to convert messages and folders to PDF without leaving Outlook.

Live Demo

Upcoming S4S Webinars

- Third Tuesday of Each Month
