Microsoft Purview

- Microsoft Purview provides a unified data governance solution to help manage and govern your on-premises, multicloud, and software as a service (SaaS) data.
- Easily create a holistic, up-to-date map of your data landscape with automated data discovery, sensitive data classification, and end-to-end data lineage.
- Enable data consumers to access valuable, trustworthy data management.

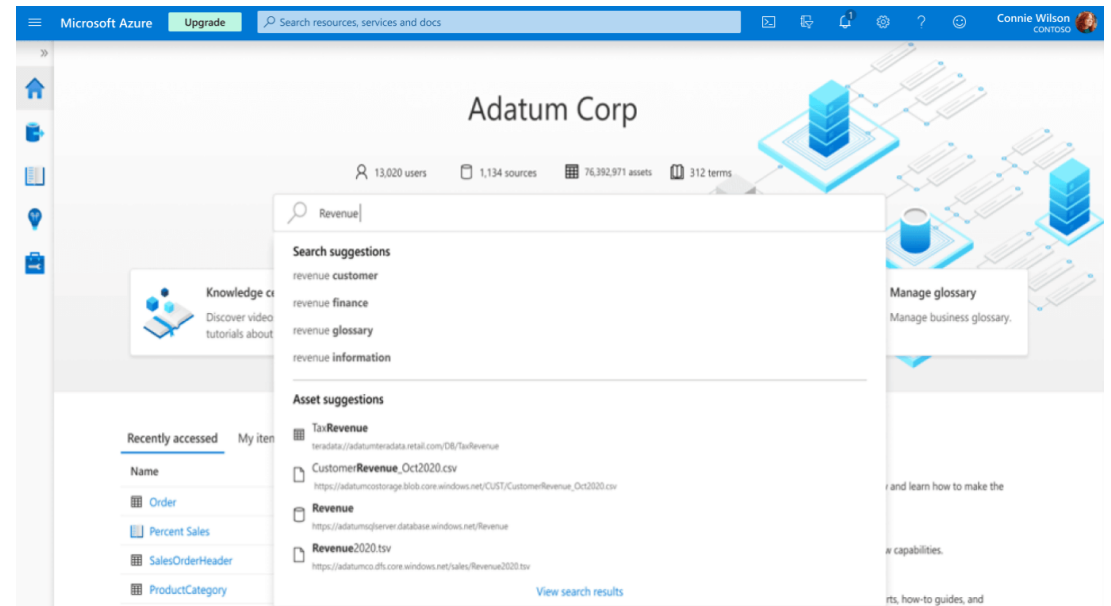

Create a unified map of data across your entire data estate

- Automate and manage metadata from hybrid sources.
- Classify data using built-in and custom classifiers and Microsoft Information Protection sensitivity labels.
- Label sensitive data consistently across SQL Server, Azure, Microsoft 365, and Power BI.
- Easily integrate all your data catalogs and systems using Apache Atlas APIs.

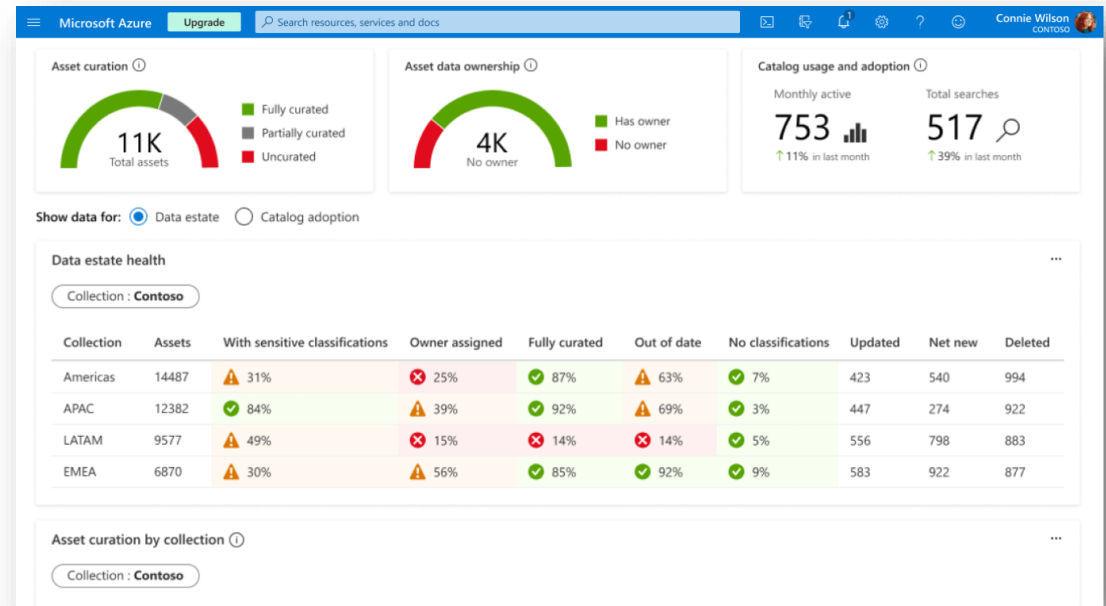

Make data easily discoverable

- Make data easily discoverable by using familiar business and technical search terms.
- Eliminate the need for Excel data dictionaries with an enterprise-grade business glossary.
- Understand the origin of your data with interactive data lineage visualization.
- Provide data scientists, engineers, and analysts with the data they need for BI, analytics, AI, and machine learning.

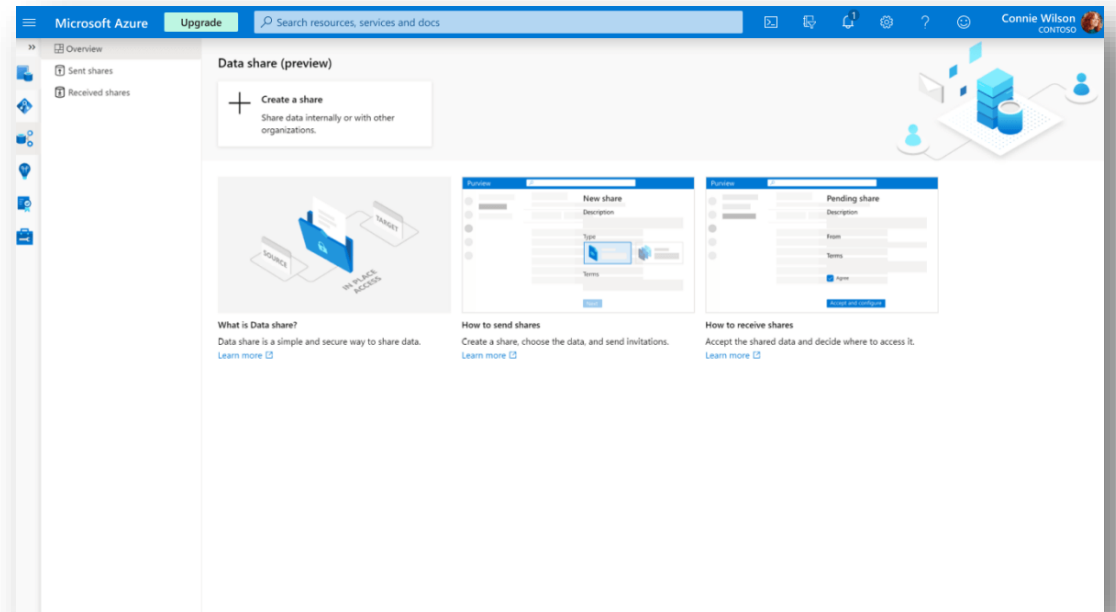

Get a bird's-eye view of sensitive data

- View and manage key health metrics across your hybrid data estate.
- View your whole data estate and its distribution by asset dimensions such as source type, classification, and file size.
- Get status updates on how many scans succeeded, failed, or were canceled.
- Gain key insights to add or redistribute glossary terms for better search results.

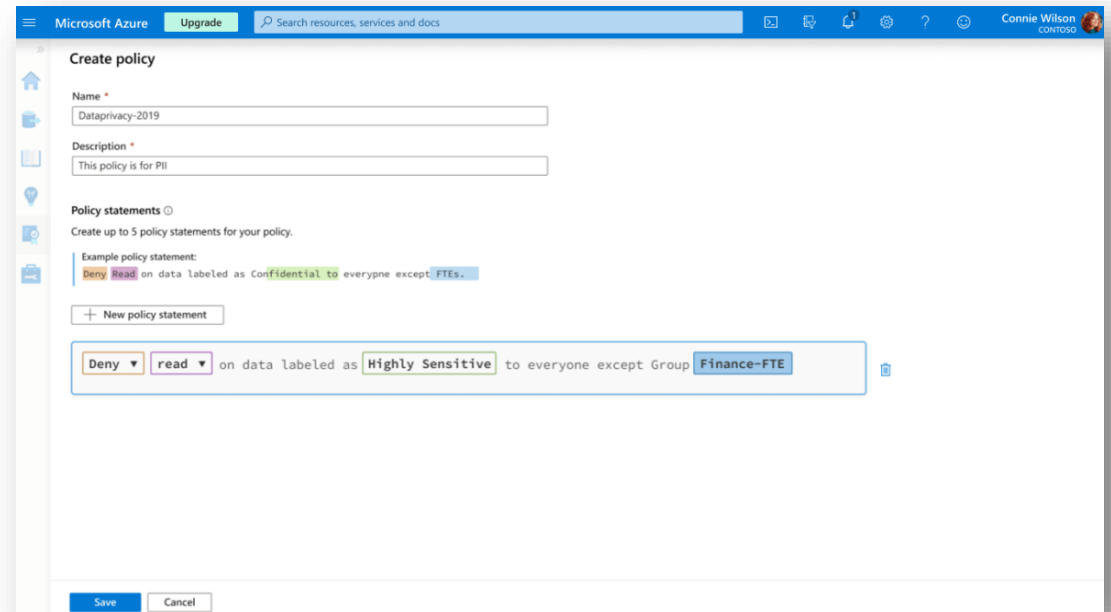

Share data without having to make duplications

- Easily share data in place with no data duplication.
- Access shared data in near real time.
- Centrally manage data sharing.
- Get support for Azure Data Lake Storage (ADLS Gen2) and Blob Storage.

Enable access to the right data for the right users

- Enable data engineers and owners to provision access to data assets.
- Get support for subscriptions, resource groups, Azure Blob Storage, Azure Data Lake (Gen2), Azure SQL DB, and SQL Server 2022.

Live Demo

Upcoming S4S Webinars

- Third Tuesday of Each Month
